Not bad at all.. So far so good: This game is the definition of: "If you can't do something original, then do something well." The writing, visuals, gamefeel, and story won't win any originality awards, but all are executed with professional competence. It's a lean, mean game and I highly recommend it on that basis.. positive review support. This is a cautious recommendation. The different stories and characters felt a bit shallow, it might have been better to focus on less and flesh that out more.. Snares of Ruin is a game about the detective Hank, who must figure out why a deadly virus has been released into the city. His partner

Gwen helps him in this investigation. This plays out as a very straightforward story where choices vary in terms of choosing attributes and romantic interests. The storyline is interesting, and the game isn't difficult to figure out. Its a nice solid story to play that doesn't require an intense amount of skill. .. The Developer has made an amazing story, this is more of a visual novel than a game to be exact, as there is no combat, or rather the combat is resolved with choices. This game is the first from the developer with romance and adds to replay value. The game surrounds 3 stats and you level up these stats from solving tasks (Quests) or by doing side quests where you can acquire some bonuses. I am impressed by this developer and have bought other games from them and I am impressed by them as well. Overall the story is up there with Witcher, Mass Effect and Dragon AGE series, ofcourse the story's romance is a bit rushed but it is expected with the length of the game being 5+ hours, if the game had a bigger budget I am sure the story and the romance would not feel as rushed. But the Romance in it self is well written as is the story. If I had the option to fund the developer to make bigger games I would, because he is that good. I cannot wait to see what else he throws our way, and to be honest he does develop games quite quickly but remain a very high quality, at least for those that enjoy story rich RPG's. This game was made with RPG maker and some might flinch at the very idea, but the developer uses the RPG maker with exceptional skill and it is fun to play for those that enjoy story driven rpg with multiple endings and what not. In short, well worth the money, and you should support this developer if you are an RPG fan, so that we can see more titles from him. RPG maker or not, he is worth the support.. Its a nice solid story to play that doesn't require an intense amount of skill. .. Great game, Wanting to buy this for a friend because i know she would love it however due to Steams "Rule" where if they're using a different currency you can't gift it to them. I mean. Its a Gift? You're telling me I can't buy a gift for a friend because she uses different currency? Its discrimination or prejudice against people who live in different countries, I for one feel highly offended, So what if i Live in a different country? we can't all choose where we live when we're born into this world. we can't choose to be a different Race Either sooo now i can't Choose to gift someone basically Might as well throw Christmas out the window too huh. You're getting money regardless of where it comes from and then there is the currency exchange rate I mean for a game thats in Canadian Currency of 20 dollars. its about 17 dollars American. Make Awareness and vote this up so the world can see. Share it, Preach it. Protest against steam Non-gifting rule.. I like zombies so much so playing a detective and trying to discover all that was a great pleasure. you can even choose different girls to mate with, but I preferred only human, Yeah, I am a real retrograd, lol. Sound is perfect, but not the kisses.(((Oh, is it so hard to make a sound of a kiss?))) At least a wisper would be better, the one in the game was so funny))) The developer is thinking to make a new chapter of this story and it would be really great.. Solution to Launch Problems! : Hiya guys. So while preparing Snares of Ruin Zero for release, I've managed to find out what's going on with launch problems that some people have been experiencing. As I mentioned in some discussion threads before, there is a third party program called Node js (Nwjs) that is required as a launcher for this game (and other more recent games of mine: Pegasus-5, Snares of Ruin, Renegade Grounds, and will also be for Snares of Ruin Zero). This program together with one of the plugins is required for integration of Steam achievements. Unfortunately from what I've been testing today, the newer versions of Node js give a lot of problems and often don't trigger achievements (possibly due to conflicts with other plugins). So, as of right now, staying with version 22.3 of Node js is the best bet to make sure achievements still trigger. However, if the computer has used a newer version of Node js for running of other games, then it could cause launch problems of games that used older version of Node js. There is a handy fix that can allow you to stop this from happening. You have to go to the following folder: C:\Users(your username here)\AppData\Local\KADOKAWA\RPGMV\UserData\Default And then scroll all the way down and locate two files: "Web Data" and "Web Data-journal", and DELETE them. This will stop the override and will allow your computer to run games that use any version of Node js that's older than the whichever is the newest version you used. If you happen to run a game later that uses a newer version of Node js, then you might have to do this fix again as the "Web Data" and "Web Data-journal" files will reappear and constantly auto-update based on what version of Node js you've been using. Just a note - AppData folder is normally hidden on your computer, so you'll first have to 'show hidden folders' from your computer's Control Panel. I hope this helps, and please feel free to ask any questions if you're still stuck. The alternative solution that was mentioned before is to launch the game via Firefox browser (by going into game folders and launching it through the file called 'index').. A Small Update (v 1.01) : Hi guys. First of all, thank you all so much for the support, for trying out the game, and for leaving comments and feedback. It's really appreciated. I've made a small update to the game, fixing a few minor bugs and adding a handful of things to the game. All the changes are in the bullet list below. Extended the dialogue with Medina

on the morning of day 10. Added more to the ending scenes, now with a little more clarification of repercussions of the chosen ending. Fixed interactable panel in the final mission that was bugged when going with the decaffeinated method. Fixed caffeinated dialogue line appearing even when decaffeinated on the very first investigation. Fixed Sancras Park ladder not being interactable when decaf. Fixed a couple of small passability errors. Also, I know a few of you have had troubles launching the game. If you do, please let us know in the discussion topic. It's possible to launch the game in a browser if the launcher is not working via the 'index' file among game's folders (Firefox works perfectly, Chrome can block it unless some settings are changed). But we're looking to get to the bottom of the problem regardless.. Snares of Ruin 2 first sneak peek! : Happy New Year, everyone! I thought it would be great to start this year with a little sneak peek of Snares of Ruin 2. This is a short video sample showcasing a bit from the first investigation. One of the things I've added to this game that my previous games didn't have are animated character busts. So now, whenever the characters talk, their mouths move and they'll blink at times too. I am hoping this can bring a bit more life to the characters during the scenes. Thank you for support and be on a lookout for further updates.. Snares of Ruin sequel and prequel. : Hello everyone! I hope you've been enjoying Snares of Ruin, Pegasus-5, and my other games. I thought I'd make this announcement to shed light on what's coming up in the near future for Astronomic Games. So, as some of you might know already, Snares of Ruin 2 is in development. I got some very useful feedback from players of Snares of Ruin 1 and Pegasus-5, and I'm keeping many of these suggestions in mind for Snares of Ruin 2. I hope to make it even better than the first, but at the same time, all the things people loved in the first game will be in it too. So - relationships with the ladies, choices & consequences, mysteries to uncover and crimes to solve, a free roam kind of feel around the town hub, the attributes, and of course I'll be saving up some budget on the CGs of special scenes with the ladies. Because of the scope, I am taking it slow with Snares of Ruin 2 and gradually funding the different custom assets that will be used in it. So, since there are still some assets that need to be made for SoR 2, there's not much main development I can do on it at the moment, so in a meantime I've decided to work on a shorter project in the Snares of Ruin universe - a prequel to be precise, called Snares of Ruin Zero. This prequel will take place during the two weeks that lead up to the beginning of the events in Snares of Ruin 1 and the story narrative point of view will be alternating between 3 of the ladies from the first game - Miroslava, Medina, and Alzyra. Snares of Ruin Zero will be a shorter project (perhaps about a couple of hours long) and I am aiming to release it before the end of the year. It's already been in development for a good month or so. It will reuse most of the graphic assets from Snares of Ruin 1, as I am mainly trying to spend the budget on Snares of Ruin 2 assets.. A small bugfix (v 1.02) : Heya all. Thank you loads for checking out the game and leaving feedback. Many of you even replayed it numerous times to check out all the alternate paths, and that is really great to hear, so thank you for the support. Some of you have found a few bugs that I've missed, so the following have now been fixed as of this update: Leaving Alzyra's room when ending the conversation prematurely during the special scene. The player sprite used to end up being transparent afterwards. Should no longer be the case. Gwen special scene build up, stopping it prematurely should not cause the bug with the wrong sprite for the player anymore. Gwen's dialogue image when you choose to deny to have breakfast at the start of day 4 used to linger on the screen afterwards. Should be fixed now. Removed some of the unused files from the game folder, so it's a slightly smaller size now. As always, let us know in the discussion topics if you have any questions or things to say about the game.. Update on Snares of Ruin 2 progress : Hello detectives! So, just a little update regarding the progress of Snares of Ruin 2. It's still going fine, although a little slower than I was hoping for due to other life commitments. So, for now, I'm aiming to have it released sometime in summer, most likely sometime after the usual summer sale period. I might post another gameplay video or possibly a couple of screenshots sometime in the near future, so keep an eye out for that. I hope it will live up to everyone's expectations.. Snares of Ruin Zero store page is live! : Hi everyone. So, the prequel to Snares of Ruin, called Snares of Ruin Zero, now has its Steam store page live. The game is planned for release on 6th of December this year if all goes well, but you can already see the trailer, screenshots, description, and to add it to your wishlist. Snares of Ruin Zero is a shorter game than Snares of Ruin and serves as a prequel that shows more of the backstory and how all the events in Snares of Ruin began. Snares of Ruin 2 (which will be a sequel) is still in development. Some of its graphical assets have already been completed by my artist, so I can begin to make some good progress on its development pretty soon.
